After nearly a decade of dedication to innovative production of our electric bicycle, Epic Cycles is proud to offer our products to the Canadian market. With so many dynamic metropolitan areas and scenic, natural trails throughout the country, we knew our products would make a great fit for Canada's avid cyclists.At Epic Cycles, our goal is to change the way people travel by promoting electric bicycle riding as a safe, green alternative to other vehicles while providing the convenience of motorization. We're thrilled to work with our Canadian customers to expand our travel by electric bicycle. Canada has proven to be a market rich in knowledgeable customers who share our vision along with cities that are also working towards green solutions. To learn more, visit our electric bicycle and electric scooter Canada catalogue.nnovation and Affordability with Electric Bicycle, Canada
Epic Cycles knows that a green solution to travel will only be successful if it meets the needs of customers. One of the primary ways to do this, is to ensure both durability and affordability. By focusing on innovative design and quality, we're able to produce an electric bicycle with a cost-effective price tag that is also able to last even with regular use and rough terrain.This is what makes our electric bicycle products the perfect choice for a wide range of customers. Whether you're a college student looking for an easy way to get around campus or an established professional who wants to reduce your carbon footprint, we provide you the best solution with our electric bicycle. Canada's diverse landscape of wide open spaces and bustling cities can easily be traversed with our electric bicycle.A Commitment to Customer Satisfaction with Electric Bicycle-Canada
At Epic Cycles, we believe that customer and product should be valued above all else. We continuously improve and revolutionize our designs to serve our customers better with a more efficient and thrilling electric bicycle. Canada customers especially love our electric bicycle conversion kits and accessories for further customization.By consistently growing our company and investing back into our production, we're able to produce advanced electric bicycle designs while serving our customers better. We back this up with our 100% satisfaction guarantee and our team of knowledgeable technicians, friendly customer service representatives

and dynamic administrative staff who all work together to ensure we produce an electric bicycle Canada customers can feel inspired by. Learn more about our customer guarantee and extensive warranty, here.Meeting Your Green Travel Needs – Electric Bike and Electric Scooter, Canada

Over our years of dedication to green travel solutions, Epic Cycles has increased our offerings to include options for electric bicycle conversion kits and models of electric scooter. Canada customers can choose one of our existing electric bicycle models or convert their favorite bike with one of our kits. Choose an electric scooter for even more travel options that are also good for anyone who has difficulty biking due to knee or joint problems.Epic Cycles – Online Electric Bikes store base in Toronto, ON

Epic Cycles e-bike products and scooters make it convenient, affordable and fun to get where you need to go while minimizing your impact on the environment. Designed with safety, innovation and ease of use at the heart of every model, we produce only the best, industry-leading scooters and e-bikes Toronto customers can feel good about riding.Electric Bikes

A modern take on a classic mode of transportation, our electric bikes make bike riding even more fun and convenient than everWhy Choose Electric Scooters and E-Bikes in Toronto?

Whether you're in the heart of a metropolitan area or you live far outside the city, electric scooters and bikes offer unique opportunities and benefits. By motorizing these modes of transport, you get many of the benefits of traditional bikes but the convenience and speed of electricity.With an e-bike, for example, you get the benefits of pedaling and being outdoors but going much faster than you would if you were relying exclusively on your own leg-power. Additionally, an electric scooter or e-bike saves you money and reduces your carbon footprint. Electric bikes and scooters also help you get around crowded cities more easily than if you were in a car and they can be taken on public transportation for even more options for travel.Innovation in E-Bikes Shop in Toronto

Epic Cycles is committed to creating only the best quality e-bikes. Toronto customers can depend on our catalogue of e-bike models to meet their needs for higher speeds, faster charge times and longer maximum distances. We consistently invest back into our company, production and design to bring you the best innovations and safety features in the industry.Electric Bike Vs Electric Bike Kit

Transform the bike you love into an e-bike with our convenient, do it yourself

conversion kit. Whether you choose an electric bike or a kit, will come down to a few factors: cost, preference and space.A conversion kit is significantly cheaper than a full bike and this may be the biggest factor. However, your personal preference about your bike will also factor in. For example, if you have a bike with a custom paint job or other parts, it is likely worth it to upgrade with a conversion kit.Finally, if you plan to keep your traditional bike no matter what, space could be a consideration. If you only have room for one bike, then the electric bike kit makes sense since it will allow you to keep your bike and get electric capabilities.Green Travel Solutions with Electric Scooter, Toronto

While Epic Cycles is all about e-bike benefits, we also know electric scooters have something special to offer as well. Some advantages include:1. Easy to Use on Sidewalk

While electric bikes can be used on sidewalk in some cities, electric scooters have lower maximum speeds and are more universally accepted on sidewalks. 2. Easy to Maneuver

Because of their slim design, electric scooters are easier to maneuver around crowds and other objects, which is another reason they can be used on sidewalks.3. Easy On and Off

The low to the ground construction of electric scooters makes them incredibly easy to get on and off of. Additionally, if you have knee problems when pedaling a bike, an electric scooter may be a better option than a bike.4.Easy Fold Design

With weights under 40 lbs. and foldable frames, scooters are even easier to store and charge in tight spaces. This also makes them easy to take on buses and the subway when needed.Affordable E-Bikes Toronto

To make the benefits of the e-bike available to more people, Epic Cycles has designed a variety of e-bike models available at a range of price points to suit most budgets. We combine quality craftsmanship with industry-leading technology and green production methods to create e-bike designs that are as fun to ride as they are energy and cost efficient.Spare Parts for Your Scooters and E-Bikes, Toronto

Epic Cycles makes it easier to fix your scooters or e-bikes. Toronto area customers can easily order one of our replacement parts or come into one of our locations to choose parts and get expert advice on repairsOrdering From Epic Cycles

Ready to change the way you travel, save money and save the planet in the process? Start by looking through Epic Cycles’ catalogue for the scooter or bike that suits your needs. Or, use our easy contact us form to get in touch with a

knowledgeable Epic Cycles representative.Quick Facts About Our Electric BikesTOP SPEEDS

Depending on the model you choose, your Magnum e-bike could reach a top speed between 20 and 28 MPG. To put that in perspective, a car averages around 18 MPH for city driving.Are There Age Restrictions On E Bike

Toronto residents should be 16 years of age to operate an e-bike in most situations. Other provinces may vary and can be as low as 12 or as high as 18.How Long Does It Take For An EBike To Charge

The model you choose will determine this, but most Magnum models get a full charge in just 4.5 to 6.5 hours.How To Properly Take Care Of My Elctric Bike?

Most of the maintenance work for electric bikes are very similar to regular bikes.Do You Still Pedal With An E Bike

Yes, and you get some cardiovascular exercise in the process. However, an e-bike makes peddling much easier and many of our models come with throttle mode to assist you when going uphill or against heavy winds.How Fare Does A Charge Take E Bike

Toronto’s varied landscape will determine how far you get on a charge in many cases. Just like with a car, the rougher the terrain and the more stop and go travel you have to do, the less miles you will get from a charge. However, in most cases, you can count on a bare minimum of 20 miles but many of our models are capable of 60 on a single charge.
