Description

Our Nurses run a successful weight loss clinic during the week and have helped a number of people lose weight safely and effectively. A complete health assessment and dietary plan to suit you as an individual is provided along with prescription Saxenda to help with achieving weight loss. Saxenda helps with curbing hunger and lowering unhealthy carbohydrate and sugar intake, allowing you to easily consume less calories and eat healthier foods. Our success rate has shown a reduction of at least 5% of overall body weight.
