

JT Data Recovery

14B Elgin Terrace
Edinburgh, Scotland EH7 5NW
United Kingdom

Phone: 0131 235 2486

At JT Data Recovery, we're Edinburgh and Leith's local specialists in getting your files back—quickly, safely, and discreetly. From Apple Mac data recovery and laptop data recovery to failed hard drives, SSDs, SD cards and iPhones, everything is handled in-house by experienced engineers. We offer a free evaluation, fixed-cost quotes and a clear “no data, no fee” promise, so you know exactly where you stand before any work begins. Whether it's a dropped portable drive, a clicking desktop HDD, a formatted SD card, or an encrypted Mac with FileVault or a PC with BitLocker, we've got the tools and expertise to help. We routinely recover from NAS and RAID systems (including Synology, WD My Cloud and Buffalo LinkStation), USB sticks and modern NVMe SSDs—covering everything from everyday misadventures to

complex multi-disk failures. Our goal is simple: recover what matters most with the minimum of fuss and maximum care. Based in Leith, we serve customers across Edinburgh and beyond with convenient options: pop in for a same-day evaluation (by arrangement) or use our secure post-in service if you're further afield. If you can't remove the drive, we can help with that too, and we also offer a local collection service for added peace of mind. When data loss strikes, get in touch and let us take it from there.
